Overweight, Ages 20+*	11,000	38%	37%
Obese, Ages 20+*	8,000	25%	25%

## Key Information

\*Percent is age adjusted to U.S. 2000 population.

# Estimates are based upon a single year of data. Cancer screening, dental visit and teeth extraction data are from 2012, while adverse childhood experiences are 2011 data. All others are 2012 & 2013, 2011 & 2012, or 2011 & 2013.

\*\*Estimated counts are rounded to the nearest thousand Vermonters and not age-adjusted. For measures where the percent is calculated using two years of data, the estimated count is divided by two to provide an average number of individuals with the behavior or condition.

☐ Indicates statistically different from Vermont.

### <sup>D</sup> Definitions:

- Poor physical health: 14 or more poor physical health days in last month.
- Poor mental health: 14 or more poor mental health days in last month.
- Disabled: activity limitations due to physical, emotional or mental problems OR any health problem that requires use of special equipment.
- Prescription drug misuse: used a prescription drug without your own prescription.
- Physical activity recommendations: 150 minutes of moderate activity or 75 minutes of vigorous activity per week.
- Strength building recommendations: muscle strengthening activities are recommended at least twice per week.
- Breast cancer screening recommendations are a mammogram in the last two years.
- Cervical cancer screening recommendations are a PAP test in the last three years.
- Colorectal cancer screening recommendations are a fecal occult blood test (FOBT) annually OR sigmoidoscopy every five years and FOBT every three years OR colonoscopy every ten years.
- ACE: for more information see [www.cdc.gov/ace](http://www.cdc.gov/ace).
- Binge drinking: five or more drinks for men and four or more for women.
- Heavy drinking: more than two drinks daily for men and more than one for women.
- Cardiovascular disease: ever had coronary heart disease, a stroke or a myocardial infarction.
